DESIGNS

Discover Amiri's stunning collection of 70 designs, each offering a unique and luxurious decor experience. The elegant fluted panels combine simplicity with striking beauty, while the natural wood-looking panels add warmth and charm to any space. Transform your surroundings with these captivating designs that enhance any environment.

MANUFACTURING PROCESS

- **Refining Raw Wood Fibers:** We start by refining raw wood fibers to ensure high quality.
- **Gluing, Pressing, and Calibrating:** The fibers are glued, pressed, and calibrated into uniform panels.
- **Routing Designs:** Panels are routed into the desired designs for a customized look.
- **Applying Textured Finishes:** A textured PVC finish is applied to the top layer for added elegance and durability.

INSTALLATION

- **Base Preparation:** Install either aluminum channels or plywood as the base for the panels.
- **Securing the First Panel:** Drill screws on the lower side of the first panel at regular intervals.
- **Overlapping Panels:** Overlap the upper side of the second panel onto the first, then secure it by drilling screws on the lower side.
- **Continuing the Process:** Repeat this process for subsequent panels, hiding the screws for a seamless, consistent appearance.
- This method ensures a polished finish and enhances the beauty of your space.

Amiri's exquisite fluted panels come in universal sizes, ensuring a seamless fit for any decor. They create a luxurious look that enhances any space.

Designed for both durability and style, these panels feature elements that elevate the overall ambiance, making your environment more inviting and appealing.
